Dear Ms. Jensen:

Following up our brief phone conversation of this morning, I am writing to obtain various kinds of information under the Freedom of Information Act:

- 1) a copy of the KPMG Report that is described in the Chronicle of Higher Education article of December 16 (attached to this email);
- 2) a copy of the list of 130 high risk institutions that are mentioned in the same article, information that describes the criteria and findings that lead to the classification of such institutions, and related information that would show when any institution was placed and/or removed from the list and any precipitating events that led to placement on the list and conduct that led to the removal of any institution from the list;
- 3) copies of all correspondence between NSF and Carnegie Mellon related to OIG Audit Report OIG 02-1001 dealing with NCOVR at Carnegie Mellon, e.g.:

<http://www.oig.nsf.gov/carnegie.pdf>

This request for correspondence relates to periods preceding the release of the report and subsequent correspondence related to CMU compliance efforts to satisfy NSF on issues raised in OIG 02-1001.

- 4) Disclosure of audits and audit findings performed by NSF of programs or activities funded by NSF at Carnegie Mellon or any subsidiary activities of Carnegie Mellon since the release of the OIG report on NOVR.

Thank you.
