Mr. Tracy -
Subj: Paying Customers

1) We need an inventory
of what we have:
a) Tapes \$1.88
b) microfiche
c) Hard copy

2) We need answer to
question of whether
one copy of tape should
be retained.

3) If we should retain
a copy of total data
base for name verifications
etc., what is your
recommendation as
to form?
(over) RW

For ^{the} specific act^s, we
should certainly destroy
all dupes! of tapes.

so) We should decide
whether we want to
produce microfiche of
forward and backward
sorts and if so complete
attached form.

Since the job is "dead"
we have no right for
processing unless answer
to (b) above is that we
want microfiche!

memorandum

DATE: 4 December 1978

REPLY TO
ATTN OF: T143

SERIAL: T143/132/78

SUBJECT: Microforms Procedural Changes

TO: Distribution

1. As a result of Executive Order 12065, T143 will be required to modify the microfiche classification title lines of all microforms applications it supports. In addition, T143 is coordinating with T142 in preparation to provide packaging and mailing of microfiche for COM Users. Therefore, this memorandum addresses both areas requesting a user response. It is imperative that this memorandum be placed in the hands of the OPI for the application indicated on the top of the attached questionnaire(s).

2. Regarding Executive Order 12065, T143 is proposing to alter the classification title lines of each microform application. Due to the limited space in the classification line, the following will be included with the classification:

REVV dd mmm yy	(review document on this date)
DNGD dd mmm yy	(downgrade document on this date)
UNCL dd mmm yy	(document becomes unclassified on this date)

The OPI must be the one who determines the date that should be used. If the fiche is classified with a codeword, is compartmented or requires special handling then REVW and a date 30 years from the generation date of the fiche would be used. Top Secret and Secret fiche will contain DNGD and a date 10 and 8 years respectively from the generation date. Fiche classified as Confidential will contain UNCL and the date 6 years from the fiche generation date. The user must complete SECTION I of the attached questionnaire(s) to concur or to alter the classification. T143 technicians will concentrate on changing the classification title lines for applications whose fiche receive external distribution. Once these applications are completed the remaining applications will be modified. The OPI is requested to complete SECTION II of the attached questionnaire(s) if the microfiche for the application is distributed externally.

3. Packaging and mailing of microfiche for external and internal distribution has been a concern of some users. If this capability were provided by T14, additional applications would be placed on the COM Systems. T142 feels that they can handle the microforms packaging and mailing, therefore taking the burden away from the user. For this procedure to function smoothly the user would have to provide a distribution list with addresses, a check list of the distribution and an original transmittal form for each external address. The OPI is requested to complete SECTION III of the attached questionnaire if interested in T14 microfiche packaging and mailing.

4. It is requested that the OPI return the attached questionnaire as soon as possible. If a questionnaire is not returned for an application, T143 will not process the job on the COM System after a reasonable reply time has expired.

5. If there are any questions contact T1431, ext. 5781/2.
